

Soumen Nath

Senior Software Engineer — Fullstack & Agentic AI Systems

Bangalore, India | (+91) 8486605732 | soumen.nath119@gmail.com | linkedin.com/in/nathshoumen | soumen-nath.vercel.app

PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years building backend systems and agentic AI pipelines on AWS/GCP. Specializes in multi-agent LLM systems and document automation for enterprise clients including AstraZeneca, Alexion, and Bank of America.

PROFESSIONAL EXPERIENCE

TrieDatum Inc Bangalore, India <i>Software Engineer (2023–2024) → Senior Software Engineer (2025–Present)</i>	Jan 2023 – Present
ProcLeg — AI-Powered Procurement & Contracting Platform (AstraZeneca) ● Procurement teams handled RFPs and vendor scoring manually — building a multi-agent system (LangGraph Dynamic Supervisor) automating RFP Creator, Retriever, Modifier, Vendor Scorer, and Contract Analyser agents. ● Replacing manual contract drafting with an HCP Agreement Generator — a four-phase pipeline (lookup → analysis → form fill → generation) with XML-level DOCX editing and RAG-based Q&A via OpenSearch. <i>Tech: LangGraph, FastAPI, PostgreSQL, DynamoDB, Redis, python-docx, AWS S3/Bedrock, OpenSearch</i>	Jan 2026 – Present
Cortex AI — Supply Chain Analytics Chatbot (Alexion) ● Replaced repetitive ad hoc data requests with a self-serve NL-querying chatbot (Cortex AI + Snowflake) for supply chain BI, with async handling and audit-compliant logging. <i>Tech: Cortex AI, FastAPI, Streamlit, Snowflake, AWS</i>	Jul 2025 – Dec 2025
Alexion Data Access Hub (Alexion) ● Manual data requests took days to fulfill — automated provisioning to minutes with 100% audit-ready governance reporting, scaling to hundreds of enterprise users. <i>Tech: Streamlit, Snowflake, FastAPI, Apache Airflow (MWAA), AWS (EC2, S3, CloudWatch)</i>	Jan 2025 – Jun 2025
Data Catalog Manager (Bank of America) ● Consolidated fragmented data catalogs into unified ReactJS modules (Catalog, Glossary, Search, Import/Export, Workflows, Lineage) with an Admin Panel and REST APIs. <i>Tech: ReactJS, TypeScript, NodeJS, Jest, Oracle, Elasticsearch</i>	Feb 2024 – Oct 2024
HALO Bassinet — IoT Smart Baby Monitor (HALO) ● Parents needed reliable remote control without dropped connections — led Android development for an IoT smart bassinet (3,000+ users) with secure BLE/Wi-Fi pairing and 99% sync accuracy. <i>Tech: Kotlin, Android, BLE, Wi-Fi, WebSockets, Firebase</i>	Jan 2023 – Jan 2024
KD Infra, Lohia Group India <i>Full Stack Developer</i>	Feb 2022 – Dec 2022

AUTOAUTO — RPA Customer Onboarding (Honda Dealerships) ● Dealership onboarding relied on repetitive manual paperwork — built end-to-end RPA across 30+ Honda dealerships, cutting onboarding time by 50% and errors by 70%. <i>Tech: Ionic, ElectronJS, ReactJS, TypeScript, Puppeteer, Google Firestore, Cloud Functions</i>	
--	--

PROJECTS

RevFlow — Revenue Automation Platform for Finance & RevOps Teams ● Solving a real pain for finance/RevOps teams: revenue data scattered across spreadsheets, CRMs, and billing tools, causing slow, error-prone month-end close and no real-time visibility into MRR/ARR. ● Architecting and building a full-stack SaaS platform solo — data model, backend APIs, frontend, and cloud deployment — to bring revenue recognition, invoicing, and reporting into a single source of truth. ● Created a distinctive neubrutalist "notebook blunt" design system — bold thick borders and paper/receipt-inspired UI motifs paired with Space Grotesk and Permanent Marker typography — to differentiate the product visually from typical SaaS dashboards. <i>Tech: React, Next.js, FastAPI, PostgreSQL, AWS</i>	Ongoing
---	---------

EDUCATION

Master's in Computer Science, Assam University	2019
---	------

CORE SKILLS

Backend	FastAPI, NodeJS, Python, LangGraph, LangChain, REST APIs
AI / Agentic Systems	Multi-agent pipelines (LangGraph), RAG, AWS Bedrock, Cortex AI, DSPy, OpenSearch, Claude LLM
Frontend	ReactJS, Next.js, JavaScript, TypeScript, HTML/CSS, Streamlit, Kotlin (Android), Ionic, ElectronJS
Databases	PostgreSQL, Snowflake, MySQL, MongoDB, Firestore, DynamoDB, Redis
Cloud / DevOps	AWS (EC2, S3, Lambda, Bedrock, ECS, CloudWatch), GCP (Cloud Run, Firestore), Docker, CI/CD, Airflow
Document Automation	python-docx, XML-level DOCX editing, PDF generation
